12	Sijan Khan	7058508339

The department has undertaken special initiative to identify the varied learning levels of the students. Both advanced and slow learners are identified through class room participation/ class test/ internal assessment examinations/ semester examination.

Guidelines which are to be designed for Slow Learners:

1. After identifying the slow learner's extra remedial classes in the weekends & special tests, providing the study materials and helping the students to solve previous exams Question papers.
2. Special care is given with the purpose of identifying the slow learners and by giving special coaching in areas where they need support.
3. Student friendly environment were created and they were motivated to come up with their innovative ideas and opinions. This kind of atmosphere will encourage students to clear their subject related doubts and seek help.
4. Slow learners are provided with additional reading material and books in simple form are made available to increase their understanding of the subject.
5. E-links are also suggested to the students to help them gain an in-depth knowledge of the subject. Bilingual explanations and discussions are done in the class with the aim of reaching out to the slow learners so that they can be brought at par with the rest of the class.
6. Personal, academic and career-related counselling is given from time to time. Home assignments and projects are given and evaluated on a regular basis.
