

2.3.2. Teachers use ICT enabled tools for effective teaching-learning process.

1. All teachers employ ICT enabled teaching methods, meticulously crafting computer-assisted materials to ensure students' active engagement. They utilise animated and simulated videos, along with various ICT tools, to create lasting and impactful learning experience.
2. College classrooms are equipped with both mounted LCD projectors and user-friendly smart TVs, all seamlessly connected to high-speed Wi-Fi. This facilitates students' access to e-content on DELNET throughout the college premises. Instructors prepare and create course-related materials, guaranteeing ready availability for students.
3. The college consistently fosters undergraduate projects, integrated into many courses. These projects instil skills such as teamwork, data analysis, and making presentations, all integrated with the latest ICT tools.
4. Written tests and assignments are administered through platforms like Google Classroom, providing students with a convenient and efficient way to demonstrate their understanding of the subject matter.
5. Active student participation in seminars and group presentations continues to be a key focus, further enhanced by the utilization of ICT tools to facilitate collaborative learning experiences.
6. The adaptability of faculty members is evident as they actively conduct online classes. This approach ensures flexibility and accessibility in education, aligning with the evolving needs of the students.
